

## 8 REASONS TO UPGRADE TO V11.0

1

### Enhanced Security Control

Flexibility to enable or disable multi-factor authentication for Customers and Staff

6

### Improved Performance

Support for scaling with 4K monitors in KODAK Pressproof

2

### Streamlined Troubleshooting

Improved data logging for customer/user creation and deletion

7

### Enhanced Security

Supports WINDOWS Server 2022, MICROSOFT Edge Browser on a Mac or WINDOWS OS

3

### Streamlined Communication

Save time with the ability to email job notes to a CSR when a new job is created

8

### Enhanced Customization in ICW

Create customized reports within a specific date range and select alternate date formats

4

### Save time and Reduce Spoilage

Set a Default PDF Preset within Gateway

5

### Enhanced Transparency

Detailed information about individual page approval and rejection provides insights for auditing and troubleshooting
