Specialty Chemicals Heterocycles

Your vision. Our experience.  
The perfect chemistry.

KODAK Specialty Chemicals Division is a U.S.-based facility with decades of experience in custom synthesis with high-quality production serving diverse markets and a long, trusted history of providing scale to innovation, particularly with heterocycles.

# Specialty Chemicals

Expertise in Custom Chemical Manufacturing

## Great ideas mean little without the capacity to execute them

Working with Kodak allows you to draw on our expertise in process development, design for manufacturing, and statistical process control. In other words, we can take a process from the “white board” into production.

We’re flexible enough to produce the smallest and largest batch sizes, which gives you flexibility of choice. And our broad product portfolio includes 1,500 approved manufacturing processes. Plus, confidential custom manufacturing services are available.

## Great results give no advantage if they’re not repeatable

A commitment to safety, health, the environment, high quality, and high technology are more than just our goals. They’re part of our DNA. Kodak has designed and manufactured chemicals for over 100 years, a heritage we simply could not have built without a firm set of standards.

Our Six Sigma Black Belt focus on quality and decades of expertise with specialty chemicals development and manufacturing means Kodak knows how to get things right the first time, and get them right consistently, batch after batch.

## Great companies are judged by the relationships they build

A relationship with Kodak is a collaboration with a U.S. manufacturer that has global capabilities. It’s a relationship built on a century-long tradition of making the complex simpler. And it’s built on trust.
